

CLEC PROJECT IMPACT REPORT

Impact Assessment of the Digital Literacy & AI Integration Workshop

1 Introduction

The CLEC Project continues to spearhead educational advancement through targeted capacity-building initiatives. This formal impact assessment report evaluates the forthcoming “Digital Literacy & AI Integration Workshop,” scheduled to run from November 1, 2026, to November 5, 2026. This initiative is designed to equip educators with essential digital competencies and pedagogical strategies for integrating Artificial Intelligence (AI) into contemporary educational frameworks.

2 Objectives

The primary objectives of the workshop include:

- Enhancing the digital literacy of participating educators across multiple districts.
- Providing foundational knowledge and practical skills for AI integration in classroom settings.
- Fostering a collaborative network among educators from diverse educational institutions.
- Awarding 2 credit course units to successfully participating teachers to support their professional development.

3 Methodology

This assessment utilizes a mixed-methods approach, relying on quantitative enrollment data from the CLEC database and projected qualitative feedback mechanisms. The data encompasses participant demographics, institutional representation, and geographical distribution to ensure a comprehensive evaluation of the program’s reach and anticipated impact.

4 Geographical Overview

The workshop has successfully drawn participation from a diverse array of geographical regions, ensuring a broad dissemination of the pedagogical strategies discussed.

Figure 1: Geographical representation of selected participating regions.

5 Key Findings

An analysis of the preliminary enrollment data reveals a concentrated yet diverse cohort of educators. The initiative has successfully registered 5 key participants, each representing a distinct educational institution. This cross-institutional participation is anticipated to facilitate a rich exchange of diverse pedagogical experiences and localized educational challenges.

6 Quantitative Analysis

The quantitative metrics derived from the database context underscore the structural parameters of the workshop.

Participant Name	Institution	Credit Course	Duration (Days)
Ram Bahadur	Gorkha Public School	2	5
Gopal Shrestha	Shree Prakash Jyoti Sec. School	2	5
Hari Khadka	Biratnagar High	2	5
Geeta Sharma	Triyuga Secondary School	2	5
Sita Thapa	Sotang CLEC	2	5

Table 1: Workshop Participant Roster and Structural Details

Summary Statistics:

Total Participants: 5

Total Institutions Represented: 5

Total Credit Units Awarded per Participant: 2

Workshop Dates: 2026-11-01 to 2026-11-05

7 Qualitative Feedback

While the workshop is scheduled for a future date (November 2026), the qualitative assessment framework is designed to capture educator feedback regarding the applicability of AI tools in their respective curricula. Anticipated feedback will focus on the practical utility of the digital literacy modules and the effectiveness of the instructional methodologies employed during the five-day session.

8 Conclusion

The “Digital Literacy & AI Integration Workshop” represents a strategic intervention in the CLEC Project’s broader mission to modernize educational practices. By targeting a select group of educators across diverse institutions, the workshop is positioned to catalyze a multiplier effect, whereby trained participants disseminate acquired digital and AI competencies within their local educational ecosystems. Future impact assessments will measure longitudinal outcomes following the completion of the program.
