

CLEC PROJECT IMPACT REPORT

Impact Assessment: Digital Literacy & AI Integration Workshop

1 Introduction

The CLEC Project aims to enhance educational outcomes through targeted interventions and capacity building. This Impact Assessment Report focuses specifically on the “Digital Literacy & AI Integration Workshop,” a key training initiative designed to equip educators with advanced technological skills. This report evaluates the scope, participant demographics, and anticipated impact of the workshop based on the project’s database.

2 Objectives

The primary objectives of the Digital Literacy & AI Integration Workshop are to:

- Introduce educators to foundational and advanced digital literacy concepts.
- Provide hands-on experience with Artificial Intelligence (AI) integration in classroom settings.
- Foster a network of tech-empowered educators across various schools and districts.
- Grant 2 course credits to participating educators upon successful completion.

3 Methodology

This assessment relies on quantitative data extracted from the CLEC project database. The analysis focuses on the demographics of the enrolled participants, the distribution of participating schools, and the projected reach of the trained educators. The data is anchored strictly to the provided training records.

4 Key Findings

The workshop is scheduled to take place from **November 1, 2026**, to **November 5, 2026**. A total of 5 educators from 5 distinct educational institutions have been enrolled in this 2-credit course.

5 Quantitative Analysis

The quantitative analysis highlights the participation metrics for the workshop.

Attribute	Detail
Training Title	Digital Literacy & AI Integration Workshop
Duration	2026-11-01 to 2026-11-05
Credit Course	2
Total Participants	5

Table 1: Workshop Details

Participant Name	School Name	Email Address
Ram Bahadur	Gorkha Public School	ram@example.com
Gopal Shrestha	Shree Prakash Jyoti Secondary School	gopal@example.com
Hari Khadka	Biratnagar High	hari@example.com
Geeta Sharma	Triyuga Secondary School	geeta@example.com
Sita Thapa	Sotang CLEC	sita@example.com

Table 2: Participant Distribution by School

Summary Statistics:

- **Total Schools Reached:** 5
- **Total Educators Trained:** 5
- **Total Credits Awarded:** 10 (2 credits per participant)

6 Qualitative Feedback

As the workshop is scheduled for a future date (November 2026), qualitative feedback from participants regarding the practical applicability of the AI tools and digital literacy strategies will be collected post-training. Anticipated feedback areas include the ease of integrating AI into lesson planning and the overall relevance of the curriculum to current educational standards.

7 Conclusion

The Digital Literacy & AI Integration Workshop represents a strategic investment in the technological capacity of educators within the CLEC project network. By training representatives from multiple institutions, the project sets the foundation for a multiplier effect, where trained educators can share their newly acquired AI integration skills with peers and students. Subsequent assessments will evaluate the practical implementation of these skills in the respective schools.
